WITH CTDOT****PROGRAMS AND  
SERVICES****AFFIRMATIVE ACTION &  
ACCESSIBILITY/ADA****PUBLICATIONS****Sep 22, 2016****Meeting - Project No.167-108, Heroes Tunnel, Rte.15, West Rock Ridge, Woodbridge, New Haven, Hamden**

The Department of Transportation (Department) will conduct a Public Informational and Scoping Meeting concerning the rehabilitation of the Heroes Tunnel, Route 15 through the West Rock Ridge in the town of Woodbridge, city of New Haven, and the town of Hamden. The meeting will be held on Thursday, September 22, 2016 at the Woodbridge Senior Center, 4 Meetinghouse Lane, Woodbridge, Connecticut. An open forum for individual discussions with Department officials will begin at 6:30 p.m., followed by a formal presentation at 7:00 p.m.

This project is identified as State Project No. 167-108 and is included in Governor Dannel P. Malloy's "Let's Go CT" transportation plan to invest in transportation infrastructure.

The Heroes Tunnel, consists of twin 1,200 foot long horseshoe-shaped tunnels, carrying two lanes of Route 15 (Wilbur Cross Parkway) traffic in each direction through the West Rock Ridge. The Heroes Tunnel carries approximately 71,000 vehicles daily and is a vital scenic connector between New York and Hartford, as well as an alternate expressway route to Interstates 95 and 91.

Structural and drainage deficiencies have been identified within the Heroes Tunnel. The general deterioration necessitates either rehabilitation or replacement. In addition to the deteriorating condition of the tunnel, other characteristics are substandard such as the electrical and mechanical utilities, all of which would be upgraded or improved through this project.

The Department has retained CDM Smith, Inc., a consulting firm with offices in New Haven, to lead the project through design. The project team recently completed a Preliminary Engineering Study where several rehabilitation alternatives were identified, including variations of tunnel rehabilitation, tunnel widening, and construction of a new third barrel.

With this initial study complete, the next phase will focus on stakeholders (area residents, public officials, commuters, or anyone else who wishes to be involved with this project) engagement, preliminary design, and environmental documentation. Design alternatives will be reassessed with consideration given to stakeholder comments. To keep the public informed, the project team anticipates launching a website and hosting a series of additional public meetings in the coming months.

This Public Informational and Scoping Meeting is being held as an initial opportunity for stakeholder participation and to allow open discussion of any views and comments the community may have concerning this proposed project.
